

# EP Power Minerals

PRESS RELEASE

Takeover

## STEAG Power Minerals now owned by the EPH Group

Dinslaken, July 29, 2021

**At the end of May 2021, the EPH subsidiary EP Power Europe (EPPE) acquired STEAG Power Minerals, which will in future trade under the name of EP Power Minerals GmbH. The website is also new, and can be reached as of now at [www.eppowerminerals.com](http://www.eppowerminerals.com).**

For EP Power Minerals, the takeover opens up a host of new opportunities: The company can now drive forward its innovations at high speed, while at the same time ensuring sustainable security of supply for its customers. “Our company has always been notable for outstanding service quality and problem-solving skills – and that is where we will position ourselves even better in the future,” says Andreas Hugot, Managing Director of EP Power Minerals. “Under the umbrella of EPH, we will systematically broaden the internationalization of our three business units Power Plant By-Products, Blasting Abrasives and Waste & Recycling, which has already begun. Asia will be a focal point of our development. With intelligent logistics concepts we will optimally harmonize the needs of the power and construction industries and thus create synergies on all sides.”

EPH benefits too: The energy supplier EPH can continue to expand its sustainable development process with EP Power Minerals’ environmentally friendly products and services, as EPPE’s Board Member Tomáš Novotný confirms. “The acquisition of EP Power Minerals enables us to reduce the EPH Group’s carbon emissions while maintaining the flexibility of our plants and the reliability of our power supply. The processing of fly ash makes a significant contribution to reducing environmental impact, which fits in with EPH’s overall sustainability strategy.”

---

### About us:

We regard ourselves as the European competence leader in the management of power plant by-products and blasting abrasives, along with industrial waste. With our subsidiaries and our growing international network we are suppliers and service providers to industry and the construction sector, providing them with high-quality building materials, blasting abrasives and industrial minerals. Since mid-2021, EP Power Minerals has been part of Energetický a průmyslový holding (EPH). EPH is a leading Central European energy group.
